

[mdbci] Maria DB Continuous integration tool - Task #7262

run_test_matrix hangs

18.07.2016 12:37 - Mark Zaslavskiy

Status:	Closed	Start date:	18.07.2016
Priority:	Normal	Due date:	
Assignee:	Mark Zaslavskiy	% Done:	0%
Category:	mariadb testing	Estimated time:	2:00 hours
Sprint/Milestone:	0.9	Spent time:	0:00 hour
Target branch:		Test scenario:	
Description			
<p>13:29] [00]</p> <p>timofey.turenko вообще этот матрикс завис и мне утром пришлось убить одну из подзадач. Тут похоже какой-то баг либо вагранта, либо шефа, либо либвирта.</p> <p>[13:29] [00]</p> <p>http://max-tst-01.mariadb.com:8089/view/test/job/run_test_matrix/backend=mariadb-10.1,box=centos_7_libvirt/11/console</p> <p>[13:31] [00]</p> <p>а письмо такое:</p> <p>[13:31] [00]</p> <p>run_test_matrix - Build # 11 - Aborted:</p> <p>Check console output at http://max-tst-01.mariadb.com:8089/job/run_test_matrix/11/ to view the results. Rebuild here: http://max-tst-01.mariadb.com:8089/job/run_test_matrix/11/rebuild</p> <p>Result: \$BUILD_LOG_PARSING_RESULT</p> <p>Coredumps: \$COREDUMPS</p> <p>[13:32] [00]</p> <p>то. есть у нас 8 отработавших тестов и один подвисший и убитый, но в отчете просто Aborted</p> <p>[13:35] [00]</p> <p>тут мысль есть про 1. таймауты в mdbci up ("если ничего не происходит больше чем, скажем, 20 минут, нет новых сторичек в логе - убивать задачу, убивать машины и может перезапустить") 2. убийство задачи должно вести к убийству машин (если не стоит do_no_destroy_vm) и освобождению vagrant_lock</p>

History

#1 - 19.07.2016 11:28 - Mark Zaslavskiy

- Estimated time set to 2:00 h

#2 - 20.07.2016 14:25 - Mark Zaslavskiy

- Status changed from New to Active / In progress

#3 - 20.07.2016 15:09 - Mark Zaslavskiy

- Status changed from Active / In progress to New

Solution:

- build hanging

-- setup build timeout (<http://docs.openstack.org/infra/jenkins-job-builder/wrappers.html?highlight=timeout#wrappers.timeout>). what type should be used ?

--- Absolute Abort build based on a fixed time-out.

--- No Activity Timeout when specified seconds has passed since the last log output.
- cleanup:
-- create clean_vms target (params: name + do_not_destroy)
-- call clean_vms with params inherited from build as a post-build action (
<http://docs.openstack.org/infra/jenkins-job-builder/publishers.html#publishers.trigger-parameterized-builds>)

#4 - 20.07.2016 15:09 - Mark Zaslavskiy

- Status changed from New to Active / In progress

#5 - 21.07.2016 16:30 - Mark Zaslavskiy

- Related to Task #7289: Add build timeout support to run_test build added

#6 - 21.07.2016 16:30 - Mark Zaslavskiy

- Related to Task #7290: Replace run_test_matrix build routines with run_test call added

#7 - 21.07.2016 16:30 - Mark Zaslavskiy

- Related to Task #7291: Modify <http://max-tst-01.mariadb.com:8089/view/All/job/destroy> job added

#8 - 21.07.2016 16:33 - Mark Zaslavskiy

- Status changed from Active / In progress to New

#9 - 03.08.2016 14:38 - Mark Zaslavskiy

- Status changed from New to Closed
