По поводу лока - очевидной причины не вижу, создал задачу <https://dev.osll.ru/issues/7663>

[10:58] [img alt="terminal icon"/>

пока подозреваю что проблема может быть в недавних правках build-scripts-vagrant

new messages

[10:59] [img alt="terminal icon"/>

```
timofey.turenko vagrant@ns3014560:~/build-scripts$ cat ~/vagrant_lock  
run_test_snapshot-14
```

11:00]

mark.zaslavskiy а там по идее свой лок - /home/vagrant/mdbci/monitoring_of_particular_branch_set_in_maxscale-bsl-20/snapshot_lock

[11:00]

http://max-tst-01.mariadb.com:8089/job/smart_remove_lock_snapshot/10/console

new messages

[11:01]

timofey.turenko но этот поставлен и дальше ничего не работает

Test

Run and abort in about 5 seconds

http://maxscale-jenkins.mariadb.com:8090/job/7663_run_test_snapshot/

Check that was triggered

http://maxscale-jenkins.mariadb.com:8090/job/7663_smart_remove_lock_snapshot/

http://maxscale-jenkins.mariadb.com:8090/job/remove_lock_snapshot/

http://maxscale-jenkins.mariadb.com:8090/job/smart_remove_lock/

There are no results for "0. Check why http://max-tst-01.mariadb.com:8089/job/smart_remove_lock_snapshot/10/console failed" action point. Please comment.

#10 - 20.10.2016 16:42 - Alexander Kaluzhny

It's common behavior because lock is deleted in run_test_snapshot_sh script.

#13 - 22.11.2016 13:44 - Timofey Turenko

- Status changed from *Testing* to *Reopened*

it tries to remove lock from wrong place:

http://max-tst-01.mariadb.com:8089/job/smart_remove_lock_snapshot/41/console

cat: /home/vagrant/mdbci/monitoring_of_particular_branch_set_in_maxscale-bsl-218/snapshot_lock: No such file or directory

aborted build http://max-tst-01.mariadb.com:8089/view/test/job/run_test_snapshot/107/console worked with 'centos_7_libvirt-mariadb-10.0-permanent', lock is in ~/mdbci/centos_7_libvirt-mariadb-10.0-permanent/snapshot_lock file

#16 - 30.12.2016 13:16 - Timofey Turenko

- Status changed from *Testing* to *Reopened*

The problem appears if shanshot revert failed and run_test_snapshot is trying to restart constantly running VMs. In this case create_config.sh script sets vagrant_lock which is not removed in case of job abort.

#17 - 30.12.2016 13:45 - Timofey Turenko

- Status changed from *Reopened* to *Closed*

closing. Works! It takes some time until vagrant_lock is removed
