<b>Target branch:</b>	<b>Test scenario:</b> Log where all env variables are injected <a href="http://maxscale-jenkins.mariadb.com:8090/job/7693_run_test/9/console">http://maxscale-jenkins.mariadb.com:8090/job/7693_run_test/9/console</a>  Check email with subject matching '[mdbci-maxscale] 7693_run_test - Build # 9' where coredumps and ctests results are shown and also build is failed  <a href="https://github.com/mariadb-corporation/maxscale-jenkins-jobs/pull/93">https://github.com/mariadb-corporation/maxscale-jenkins-jobs/pull/93</a>  Job is valid <a href="http://max-tst-01.mariadb.com:8089/job/validate_yaml_by_pushes/112/">http://max-tst-01.mariadb.com:8089/job/validate_yaml_by_pushes/112/</a>
<b>Description</b> The build below contains logs of successful build parsing, however the parsing results are not displayed at build letter ([mdbci-maxscale] run_test - Build # 861 - Failure! (1.4.4-retest-oct25)). <a href="http://max-tst-01.mariadb.com:8089/job/run_test/861/console">http://max-tst-01.mariadb.com:8089/job/run_test/861/console</a>  What should be done: fix build parser yaml files / behaviour to display build parsing results (as in run_test success letters ) in email for failed run_tests similar to <a href="http://max-tst-01.mariadb.com:8089/job/run_test/861/console">http://max-tst-01.mariadb.com:8089/job/run_test/861/console</a>

retested, works. Failure happened with job started before jobs update.
