It's repo should have next link http://max-tst-01.mariadb.com/ci-repository//monitoring_of_particular_branch_set_in_maxscale-bsl-477/mariadb-maxscale//centos/7/\$basearch |

Description

markusjm [2:51 PM] 

there's something definitely wrong with the snapshot tests

[2:52] 

it uses a build from December 16th

[2:52] 

from commit d457f9cd03c120e5c8b0f07714e5232be5478bda

markusjm [3:00 PM] 

ah, I think this is the reason:

```
[ {  
"product":      "maxscale",  
"version":      "default",  
"repo":         "http://max-tst-01.mariadb.com/ci-repository//develop/mariadb-maxscale//centos/7/$basearch",  
"repo_key":     "http://maxscale-jenkins.mariadb.com/repository/release/mariadb-maxscale/Maxscale-GPG-KEY.public",  
"platform":     "centos",  
"platform_version": "7"  
}  
]
```

[3:00] 

it always uses the develop repo

[3:00] 

I'll update the develop repo and see if it starts to use the newer one

[3:00] 

so the repo generation is somehow wrong

[3:01] 

it was last updated december 19th
